**INTERVIEW SUMMARY RECORD**

Commissioner for Patents  
P. O. Box 1450  
Alexandria, VA 22313-1450

Commissioner:

On October 6, 2004, the Examiner in charge of this case, Examiner Ralph Gitomer, contacted the undersigned representative to discuss the allowability of the claims. During that telephone discussion, Examiner Gitomer advised the undersigned representative that he understood that a final Decision on Remand from the Federal Circuit had been recently issued by the USPTO Board of Patent Appeals and Interferences in Interference No. 103,586 and that in that Decision on Remand, the Board of Appeals again awarded priority to Barbacid and not Drs. Brown, Goldstein, and Reiss, the inventors of the present application. The Examiner requested Applicants to provide a complete copy of that opinion for making of record in the file, which

Applicants did on November 2, 2004. The Examiner indicated during that telephonic interview, however, that it was his conclusion that the present claims were patentable over the count at issue in Interference No. 103,586 and thus the award of priority to Barbacid was not considered to be relevant to the patentability of the present claims.

Applicants respectfully request that this Interview Summary Record be made of record in the present case. The Examiner is, of course, encouraged to correct any misstatements.

Respectfully submitted,

David L. Parker
